Dear Physician:

For a custom AFO (ankle-foot-orthosis) to be covered by Medicare, all applicable Medicare statutory and regulatory requirements must be met. Medicare requires a physical evaluation of the patient, and **the following bullet points must be included in the physician's chart note.** (Medicare does not consider a letter part of the medical record). Please fax any Medicare compliant chart notes to our office.

The physician must document AND DISCUSS the following:

- 1) Patient is ambulatory (or, if not currently ambulatory, the plan to progress the patient to ambulation); **and**
- 2) Patient has a weakness or deformity of the foot and ankle; **and**
- 3) Patient requires stabilization of the foot and ankle for medical reasons; **and**
- 4) Patient has the potential to benefit functionally from the use of an AFO; **and**
- 5) Why a prefabricated device will not work; **and**
- 6) Why a custom device is medically necessary.

****The physician must also document AND DISCUSS** at least one of the following:

- a) The condition necessitating the orthosis is expected to be permanent or of longstanding duration (more than 6 months); **or**,
- b) There is a need to control the knee, ankle or foot in more than one plane; **or**,
- c) The beneficiary has a documented neurological, circulatory, or orthopedic status that requires custom fabricating over a model to prevent tissue injury; **or**,
- d) The beneficiary has a healing fracture which lacks normal anatomical integrity or anthropometric proportions.

Thank you, and please let us know if you have any questions or concerns.
